

EVANS BETT

SOFTWARE DEVELOPER

Eldoret, Kenya | 0705712310 | evans.k.bett5@gmail.com

GitHub: github.com/ekbtech

PROFESSIONAL PROFILE

Results-oriented Software Developer with a Bachelor's Degree in Information Technology and practical experience in software development, system maintenance, technical support, and production-system troubleshooting. Experienced in healthcare and business systems, including Point of Care (POC), AMRS, and POS systems. Strong full-stack development foundation with modern web technologies, databases, APIs, version control, and cloud deployment. Passionate about transforming ideas into reliable, user-focused software solutions.

PROFESSIONAL EXPERIENCE

AMPATH — Software Developer / Systems Support | 2026 – Present

- Maintain and support operational software systems to improve reliability, availability, and user experience.
- Participate in system development, enhancement, testing, deployment, and maintenance activities.
- Troubleshoot application and system issues and provide technical support to users.
- Contribute to continuous improvement of existing systems and workflows.

Checonex Investment — Software / Systems Support | 2024 – 2025

- Maintained and supported business information systems and day-to-day software operations.
- Worked with Point of Sale (POS) systems and supported users with system-related issues.
- Participated in system development, testing, updates, troubleshooting, and maintenance.
- Helped ensure systems remained functional and aligned with operational requirements.

EDUCATION

Kabarak University — Bachelor's Degree in Information Technology (IT)

TECHNICAL SKILLS

Frontend: Next.js, React, JavaScript, HTML5, CSS3, Tailwind CSS

Backend & APIs: Node.js, REST/API development, PHP, Python

Databases: MySQL, MongoDB, SQL

Development & Version Control: Git, GitHub, Visual Studio Code

Deployment: Vercel and web application deployment

Systems: POC systems, AMRS, POS systems, system maintenance, troubleshooting, testing

SELECTED PROJECTS

MedConnect — Patient medication tracking application built with Flask, MySQL, and server-rendered HTML/CSS/JavaScript. Includes local deployment and database integration.

Pro Car — Online Car Rental System — Full-stack car rental platform with customer, company, and admin workflows, booking management, payments, reporting, PHP backend, and MySQL database.

Weather Dashboard — Responsive weather dashboard built with Vite and JavaScript, featuring current conditions, forecasts, hourly outlook, city search, location support, and unit switching.

Second-Hand System — Web-based second-hand marketplace with authentication, listings, favorites, messaging, profiles, APIs, and database integration using PHP/JavaScript.

Android Car Rental App — Android application concept for a car rental system, demonstrating mobile application development and rental workflow design.

Invoice Generator — PHP/MySQL invoice management application with client records, authentication, invoice creation, saving, and viewing functionality.

GITHUB PORTFOLIO

github.com/ekbtech — Public portfolio containing software development projects including MedConnect, Pro Car, Weather, Second-Hand System, Android Car, and Invoice Generator.

CORE COMPETENCIES

- Full-stack web development
- System development and maintenance
- API and database integration
- Application testing and deployment
- Troubleshooting and technical support
- Problem solving and analytical thinking
- User support and technical communication
